CLEAN WATER ACT AND THE GREAT LAKES INITIATIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Ms. KAPTUR] is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, I come to the well this evening to express my strong opposition to H.R. 961, the Clean Water Act amendments and why I urged its defeat. It steps back from the progress resulting from our Nation's commitment to clean water as a national treasure.

I represent a Great Lakes district along Lake Erie. Cumulatively, the Great Lakes contain 20 percent of all the fresh water on the face of the Earth. For those of us who remember when swimming or fishing in Lake Erie was hazardous to your health, the actions the House is taking to weaken Clean Water Act protections are backward-looking. I am astounded that anyone can fail to see the great progress we have made over the last 25 years to clean up our Nation's water. Today, after two decades, the job of cleaning up Lake Erie is one-half finished. Our progress is laudable, but the goal has not been achieved along our coast or on the Nation's other major waterways.

I can remember when the Cuyahoga River burned and when Lake Erie was declared dead. Some of our colleagues, Mr. Speaker, have apparently forgotten. We have made great strides toward renewing our water resources, but there is still a long way to go. In Ohio, 92 percent of our lakes and 60 percent of our rivers still cannot support fishing or swimming on a year-round basis. Some of our waters still cannot support aquatic life. Just last summer the city of Toledo found it necessary to pump fresh water into the Ottawa River just to restore some oxygen and flush out the polluted discharge from combined sewer overflows. The job of cleaning our waters is far from over. The task of cleaning up dozens of major toxic burial grounds leaching into our fresh water tributaries stands before us.

The aspect of H.R. 961 about which I am most concerned is the provision to make adherence to the standards of the Great Lakes initiative voluntary on the part of Great Lakes States. This initiative has been a model bipartisan effort to standardize water quality protections in the Great Lakes watershed. Over the last 6 years, Federal guidelines have been developed, which, under current law, the States have 2 years to implement. Under H.R. 961, adherence would be voluntary. States could choose which standards to implement
